HYPER BEE

Safety Features

Multi-layered Protection, Inside Out

- Magnetic Emergency Switch
- Electronic Gyroscope tilt power-off protection
- Upper and Lower chain guards
- Full disc design for the drive wheel brake
- Handlebar shock-absorbing grips
- Body protection pads

The Surron Hyper Bee enhances rider safety with features that prevent accidents and maintain stability. Its protection systems secure you during sudden movements, while the reliable braking offers effective stopping power. Shock-absorbing grips and body pads minimise impact and improve control for a smoother ride.

Hyper Bee Remote Control

Active Safety Functions

Surron Hyper Bee pioneering vehicle remote control equipped, integrating remote communication, power level adjustment, and emergency power-off functions. With communication distance of 492 - 984ft estimate, outdoor exploration communication is seamless.

3 riding modes can be switched freely, with gradual power outpout for a more comfortable ride (riding modes can also be switched on the vehicle's dashboard). The one-touch emergency power off button ensures rider safety.

Featherlight Arrival, Rules Redefined

Uncompromising Design

After 18 months of relentless development, the Surron R&D design team meticulously refined hundreds of prototypes, perfecting every gram and milimeter, to achieve an incredible weight of just 38kg! **Lightweight excellence in very detail, brilliance in every feature.**

10-second battery swaps are a breeze with the innovative coverless battery and 'S-S' lock design. Overflowing with creative inspiration, empowering your limitless riding.

The all-new power system, this setup features high-performance 21700 batteries brimming with energy, MTPA/MTPV controllers, and an integrated magnetic cylinder longitudinal motor. Coupled with a newly designed angular reducer, it ensures swift and direct power transmission. **The system strikes a perfect balance between robust power and refined resposiveness,** while being safe, reliable, and easy top maintain.
